

ALPSPITZ FERRATA

Osterfelderkopf – Alpspitz – Nordwandsteig

Garmisch-Classic
HAUSBERG KREUZECK ALPSPITZE

START Alpspitzbahn mountain station
FINISH Alpspitzbahn mountain station

The starting point for this via ferrata is the Alpspitzbahn cable car mountain station. Initially, the trail leads in a southerly direction below the Höllentorkopf. After approx. 15 minutes following the „Ferrata“ signs, you will reach the entry of the Alpspitz Ferrata.

Along wire ropes and over steel pins, the route leads to the summit of the majestic Alpspitz. After around one and a half hours climbing, you can enjoy the wonderful view of Garmisch-Partenkirchen in the valley, the majestic Zugspitze to the left and the surrounding mountain peaks.

The way back runs along the rugged eastern flank and some rocky passages into the large Oberkar. From there, the tour leads via the Nordwandsteig back to the mountain station of the Alpspitzbahn cable car, which takes you comfortably back to the valley.

ATTENTION

Appropriate knowledge and equipment are required for the via ferrata. Surefootedness and a head for heights are required.
