

# ZUGSPITZE

Via Höllental

**START** Cogwheel train station Hammersbach  
**FINISH** Zugspitze

Probably the best-known and most popular ascent to the Zugspitze is via the Höllental valley. The starting point of the high alpine tour is Hammersbach, which can be easily reached by the cogwheel train of the Bayerische Zugspitzbahn or by car.

From there it goes through the Höllental gorge on to the Höllentalanger hut. Then follow the Höllentalanger to the first steep ascent at the ladder.

A little above, the route continues over the „Grüner Buckel“ to the Höllentalferner. Crossing this section, which is only possible with climbing irons leads the climbers to a moderately difficult via ferrata. This leads up to the summit of Zugspitze.

The descent can be made in comfort with the Bayerische Zugspitzbahn cable cars.

## ATTENTION

High alpine tour with glacier crossing and via ferrata. Appropriate high alpine skills and equipment are required. An overnight stay is recommended.
